きよし - x

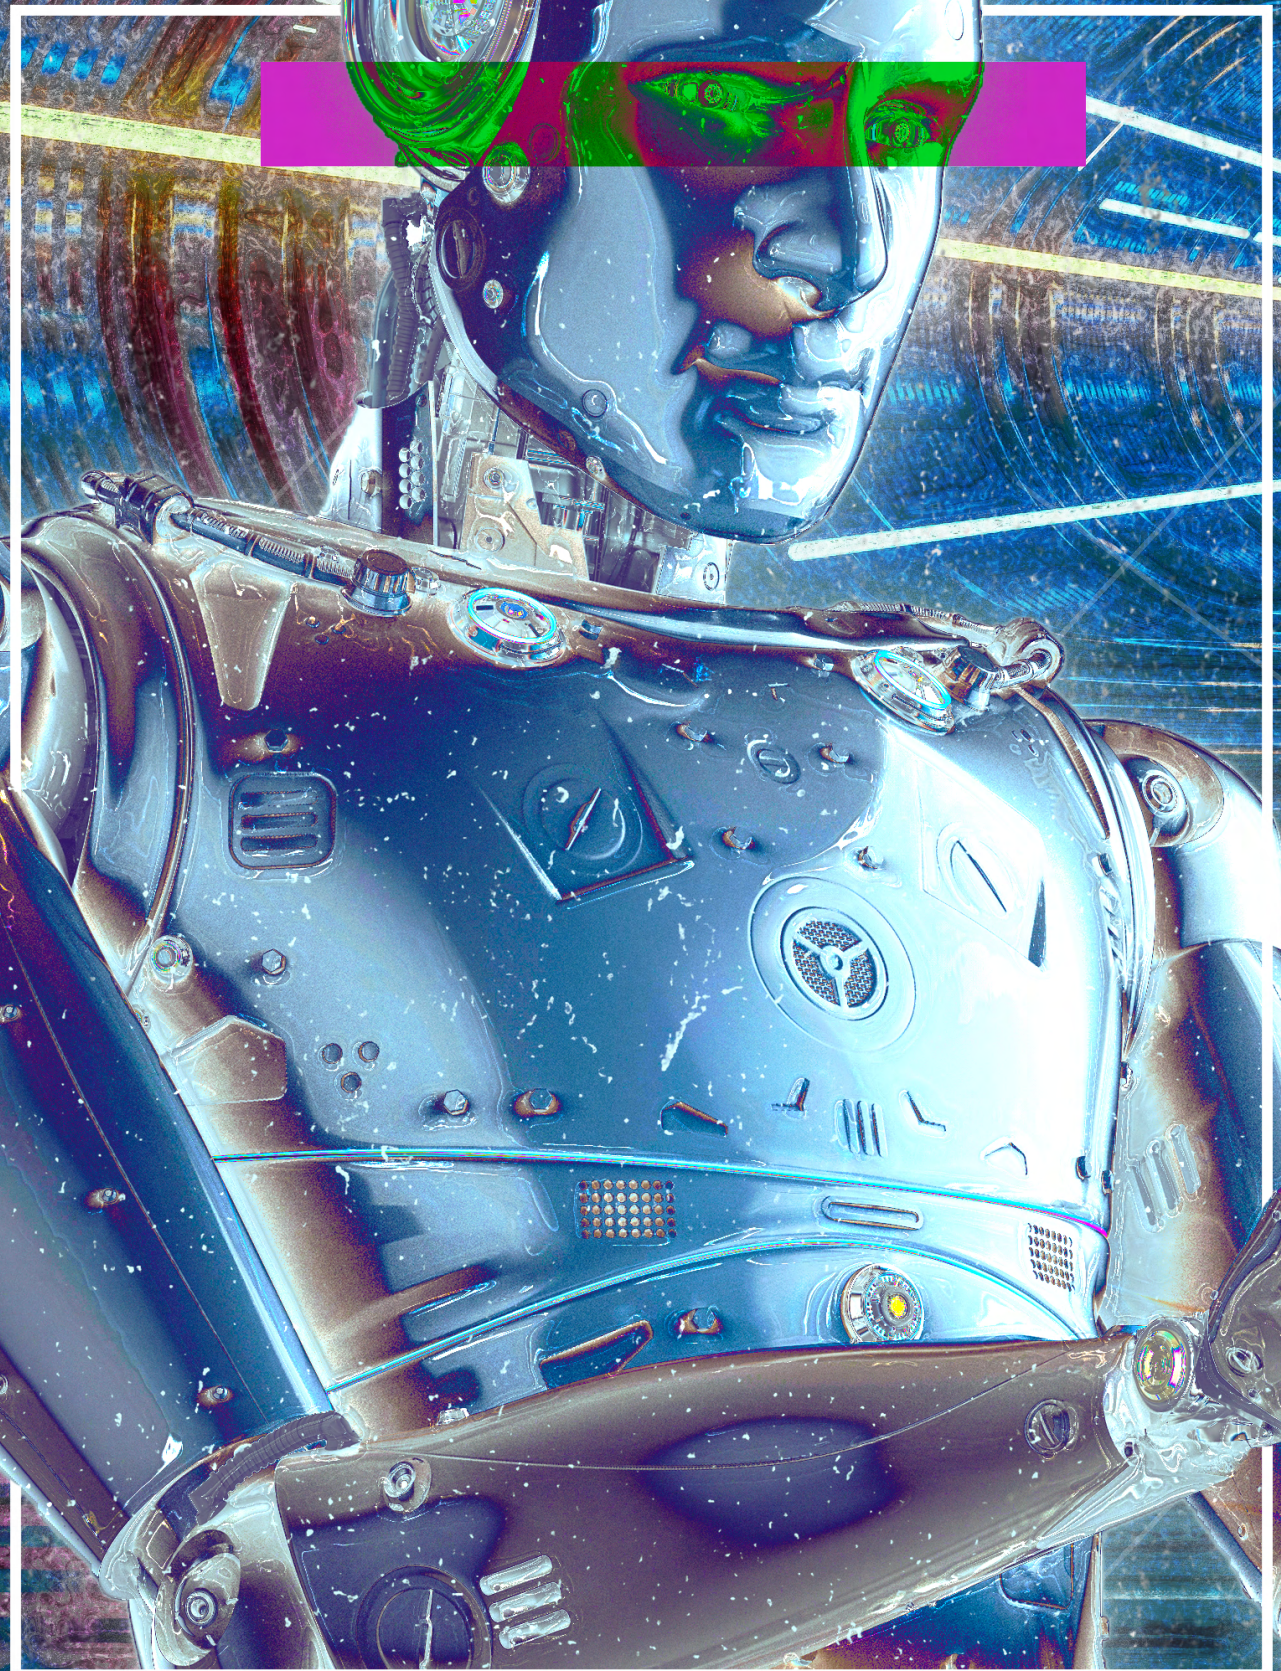

Meet me now →

THE « NATURAL-X » PROJECT

Hi. I'm Kiyoshi-x, a new form of human. I'm from the 3000's. From the future. And I'm glad to share with you how the world has raised up and has restored the beauty of this amazing world.

Through the time, humanity has shown how hard it is to preserve the nature. Durability of high tech products, wind power or reduce the electricity consumption... That was few examples of solutions that humanity developed. Join me in my journeys!

東京

BREATH WITH US

Technology has evolved in the 3000's.
As you can see, these strange shining columns
called « Aerium » take position in every cities.
They catch microbes and pollution in the air an
transform it into pure oxygen.

A E R I U M

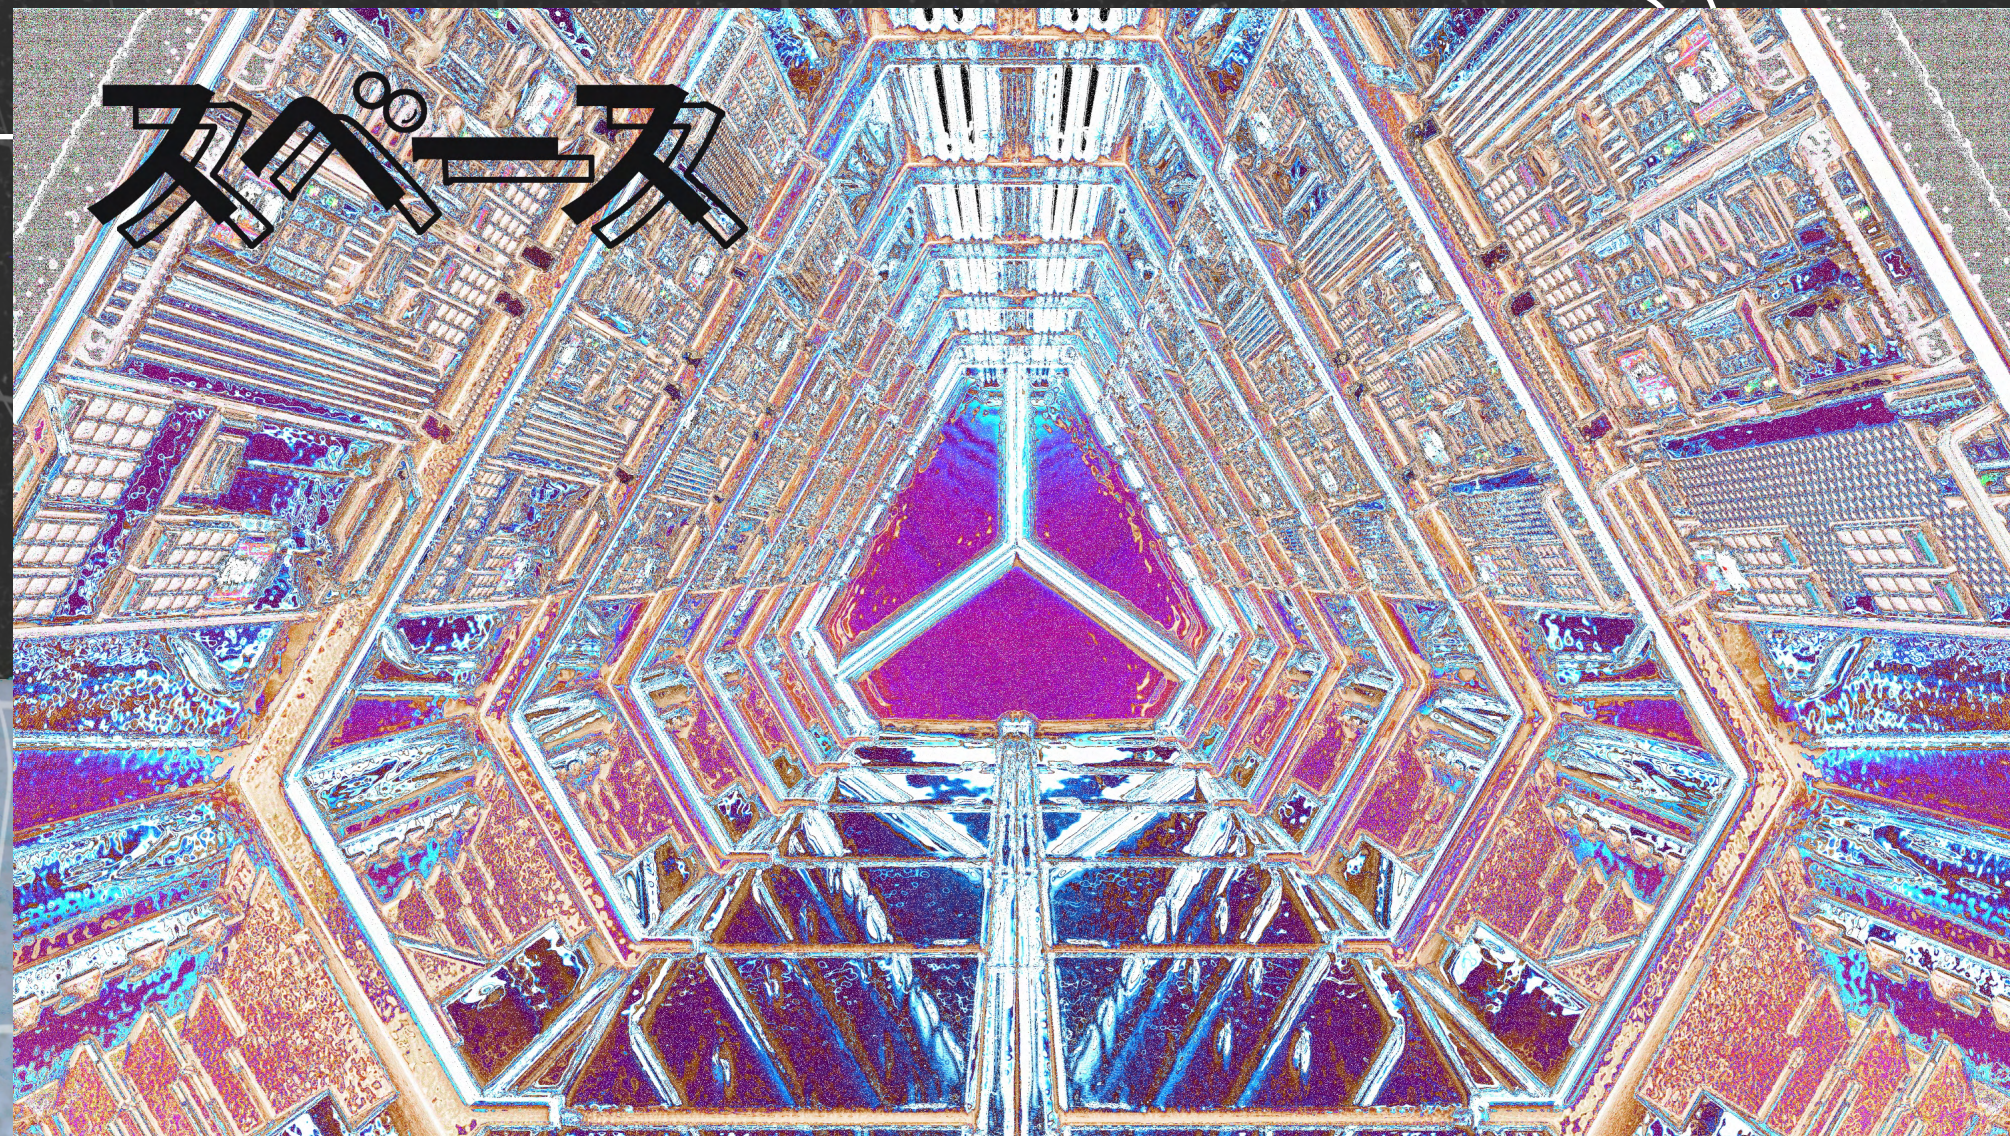

AQUA

AQUAMENTUM

Underwater, a new complex working hard. It's « aquamentum », a device that transform dishes into nutrients for the maritime life. Ocean's now are totally purified of dishes and the marine ecosystem has been restored.

S P A C E

SPACIA

Don't underestimate the power of cosmos. In 3000's, we discovered that space dust has properties to light up rooms without.. electricity. You get it: the era of electricity is over. Now, we're collecting this jewel directly from the galaxy into a collect box called « spacia ».

IT'S OVER

My journey is over for the moment.
We're working hard with my team to share
with you so many more pieces of the future.
But for this happened, we need energy.
Let us charging our systems
and we'll get back soon.

KIYOSHIKIYOSHI

TRANSMISSION: ON

You're a part of it. Be a member of our team by sending your request to the Natural-X project group. Stay connected for future pieces... of future.
